Services scientific study to determine the significant impacts of planned activities and environmental feasibility, so it would be prepared for management plan and environmental monitoring, which is RKL-RPL in bahasa. The output of AMDAL document preparation are environmental permits as a condition of licensing later.

INFRASTRUCTURE PLANNING

Comprehensive services during the planning phase to manage and mitigate risk, ensure the quality of infrastructure in accordance with the applicable standards and regulations.

- Feasibility study
- Land Acquisition Planning
- Front End Engineering Design (FEED)
- Detail Engineering Design (DED)
- vendor Assessment
- Design Review (Independent Checking Engineer (ICE))
- Independent Design Checker (IDC)

INSPECTION CRANE

Freight lift equipment inspection to ensure the safety and reliability of the equipment in accordance with regulatory requirements.

CONSULTING APPLICATION OF INDONESIAN NATIONAL STANDARD (SNI)

Services to assist organizations / companies in implementing the Indonesian National Standard (SNI) that effectively and efficiently as a commitment and concern for the management of the quality of the resulting product.

CONSULTING AND TRAINING FOR SAFETY MANAGEMENT SYSTEM OHSAS 18001

Services to assist organization / company in implementing Health and Safety Management System OHSAS 18001 work effectively and efficiently as a commitment and concern for the management of the K₃ and improve the performance and image of the institution / company.

CONSULTING AND TRAINING FOR MANAGEMENT SYSTEM QUALITY ISO 9001

Services to assist organization / company to implement the ISO 9001 Quality Management System that effectively and efficiently as a commitment and concern for the management of the quality of the resulting product.
